IBM – Naalaiya Thiran

Data Analytics for DHL Logistics Facilities

THIS PROJECTS AIMS TO BUILD AN ANALYTICAL DASHBOARD FOR LOGISTICIS DATA USING IBM COGNOS

PROJECT DESCRIPTION

This dataset contains a lot of Logisticial data

Why is logistics important today because consignment items make customers frustrated and loss of consignment which over time could damage a company's reputation and lose future endavours and sales. An effective retail inventory management system will provide the tools to manage this whole process.

Skills Developed:

1. Exploratory Data Analysis 2. IBM Cloud
